Publications

The following publications (196 papers plus 7 theses) relate to all work carried out at LANSCE and reported since the 2002 LANSCE Activity Report (LA-14036-PR) was published. Work performed elsewhere by LANSCE staff is included where relevant. **This list does not include publications submitted or in press as of December 2003.**

Publications are an important "product" of LANSCE and a valuable metric to our sponsors and review boards. All facility users are requested to send complete references of all publications resulting from experimental work conducted utilizing LANSCE resources, in whole or in part, to the User Office.

Authors should bear in mind that LANSCE is funded by the U.S. Department of Energy, and an appropriate acknowledgement is required. A recommended acknowledgement citation is the following:

This work has benefited from the use of the Los Alamos Neutron Science Center at Los Alamos National Laboratory. This facility is funded by the U.S. Department of Energy under Contract W-7405-ENG-36.
